Learn the real story

Bring the country to life as Tess Atie and her guides share the stories of generations.

'I grew up around where Litchfield National Park is now, travelling and camping with my family. I developed a great respect for my old people. They showed me all the fine details about the plants and animals on our country, and how to live properly there. Later I became a park ranger and wildlife park guide. Now I want to teach visitors about our beautiful country'.
